CROATIAN  
TEAM IN TÜRKİYE

In Turkey was beautiful. Math lessons were interesting and I learned something new. I never done origami math but when I started to doing it I enjoyed it. I liked when we use our mobile phones to do math with program. Panorama museum was something new for me. In Panorama museum we could see old Turkish stuff from Ottoman empire and 3D display how people used to live in Ottoman empire. I liked technology museum because we could interact with almost everything in museum. GUHEM was interesting we could see how astronauts live in Mars, what they eat and other stuff they do on Mars Students were so friendly and nice to us.

Dino Vukoja, 8th grade, Croatia

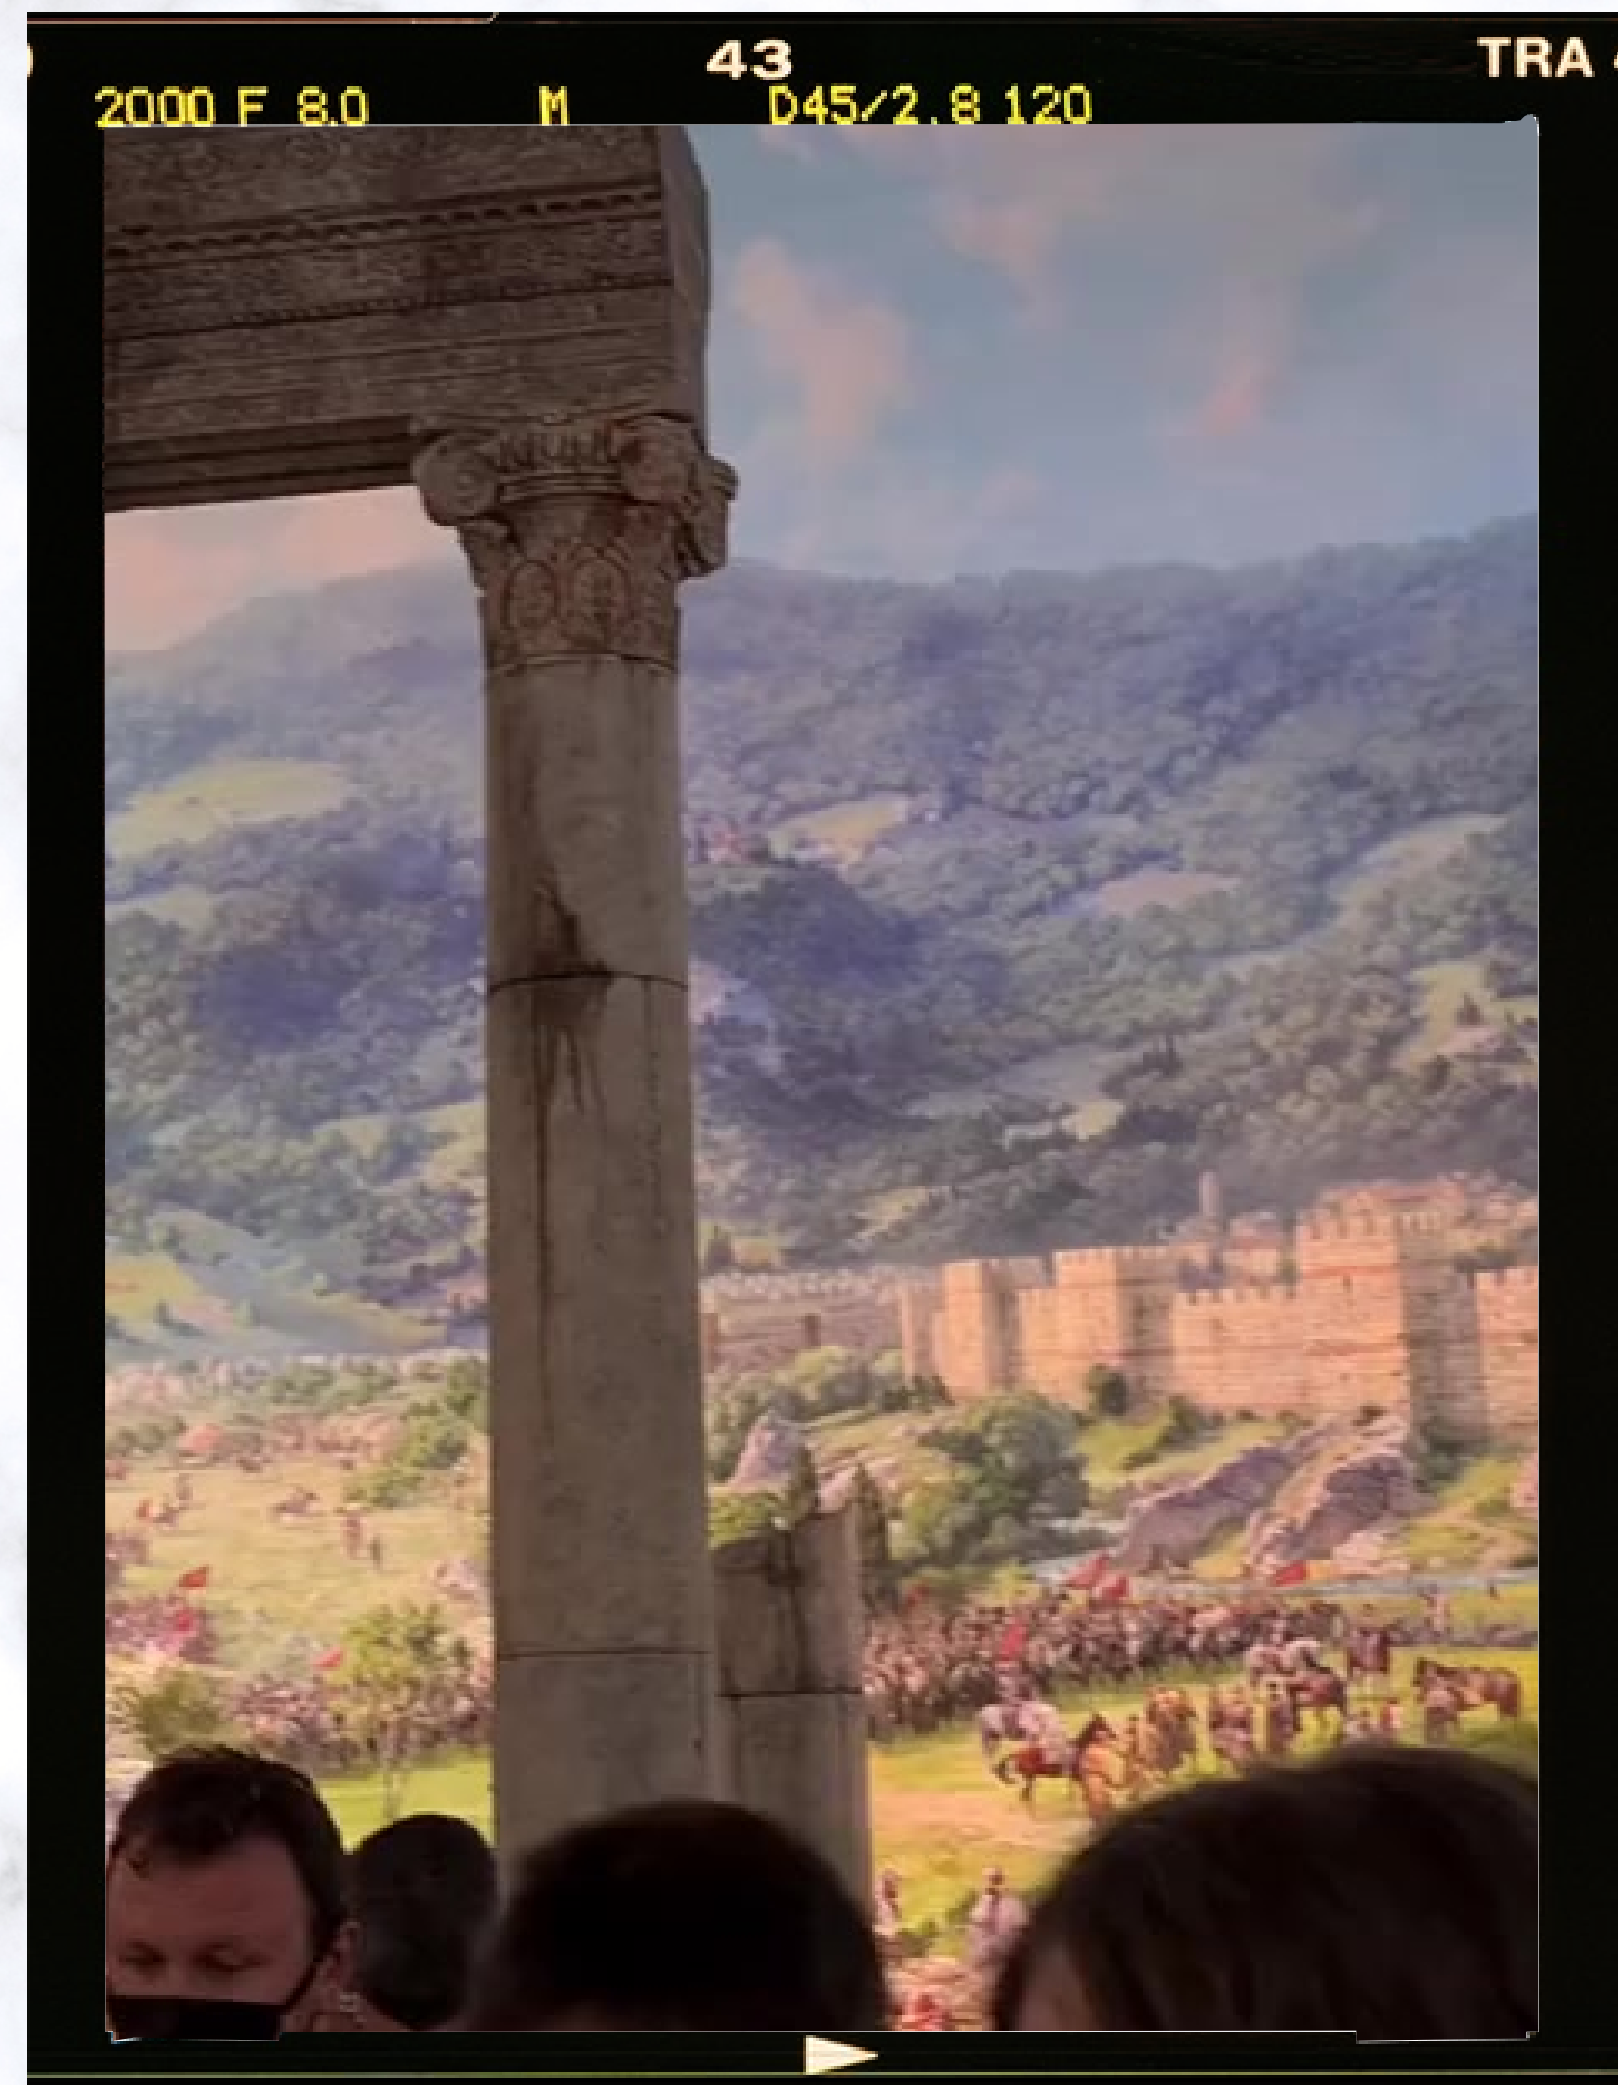

*Science is all around us*

I had a lot of fun in turkey. I met a lot of new people and it was interesting to see different cultures and places there. At the maths lesson I learned a lot about geometric constructions and origami techniques. The museums were interesting and fun, I especially liked the history museum Panorama 1326 in Bursa. I had a lot of fun hanging out with students and I made a lot of new friends. I will always remember it as a beautiful experience.

-Elena Balić, 8th grade, Croatia

ROMANIAN TEAM IN TÜRKİYE

My experience in Turkey was much different from other experiences in my country or with my school. I discovered many new places, in short I really liked Turkey! The visits that really fascinated me were a visit to the bazaar, the Bazaar being a small mall where you could find everything from jewellery to clothes and at the mosque, which is a holy place for all Turkish people. The school with which we are working on this project was exceptionally nice, and everything was well-organized, from the playgrounds to the study areas! The greatest spect of this trip was making a lot of new friends with whom I am still in contact now. All in all, my participation in this Erasmus+ project in Turkey was wonderful and I would like it to happen again. :)

Blaga Sutu Rares Stefan (VII grade) Romania

*Greetings from  
Bursa*

*This year's SAAL Erasmus+ project was a fantastic experience, in my view. I had the opportunity to participate in the first LTTA, which took place in Bursa, Turkey, where I met wonderful people and interacted with a lot of intelligent students with whom we will have long friendships.*

*Opriş Ana Maria Antonia (VIII grade),

## **Oliwia Zając, Poland:**

I had the pleasure to participate in the meeting of the Erasmus+ SAAU project as a member of the Polish team. We met in sunny Bursa in Turkey. We got to know students from the countries participating in the project. The classes during this Erasmus showed us new ways to learn Maths (for example through the app). We visited some interesting places (for example Ulu Mosque and Kozahan Market) and we got to know the history of city in the wonderful old town. My favorite was definitely the trip to Iznik. Beautiful lake, delicious lunch and fun outdoor Maths activities.

# Portuguese Team in Türkiye

As a student at Escola EB 2,3 de Rio Tinto I have always been part of the "European Club", but I was far from imagining that the knowledge I was developing would go beyond a simple computer. When I was challenged to participate in the mobility to Turkey, I confess that I was scared! It is worth saying that I had never left Portugal, nor had I ever flown in an airplane! There were moments of hard work leading up to the trip, but the experience was enriching and unforgettable! I felt that my learning was enriched, I had the opportunity to experience first-hand situations of diversity and tolerance, and the knowledge about tangible and intangible heritage, differences and similarities of the country I visited went beyond any scale or expectation!

Sara Gomes, 9th grade  
Rio Tinto Primary School 2,3, Portugal

# TURKISH TRADITIONAL DANCE

This september we welcomed our guests from other countries through this project. It was an unforgettable week for all of us. At first we were a bit excited while waiting for the opening meeting to start. It was the first time we saw each other. After 15 minutes the tense atmosphere left itself to a warm conversation. We travelled across the city showing our new friends our culture, history and natural beauties. They tasted our traditional dishes and we realized we have a friendship bracelets, showed them our school, chatting about everything that comes to our mind. I'm glad that I joined this project and had a chance to take place in it. It gave us a lot ; cultural interactions, experience to talk with others, friends... I hope we continue this Project in the same way.

# 2nd LANGUAGE TEACHING TRAINING ACTIVITY

21. - 25. February 2022  
Porto, Portugal

# Turkish Team in Portugal

Portugal was my first experience in Europe. I learned lots of things about Europe in our trip for example; I met lots of Europeans and became friends with them. I learned about their lifestyle and their families. But I think the most important thing about my Porto trip is I finally know about life outside of Turkey.

Ahmet Mert K.

Pelin K., Türkiye

When i heard i was going to Portugal, i became so excited. It was my first time in a different country but thanks to the team and teachers, i had great moments and memories. I made nice friendships with foreigner students too. I saw an ocean first time in my life and sightseeing on a boat was amazing. I loved Portugal, Porto and delicious food culture. In fact i don't find seafood delicious but the seafood that i ate in Portugal was delicious as much as possible.

Also I found so different kinds of gifts for my family and friends. While shopping I didn't have any problems, generally everybody knew English and i was a little bit surprised. Also we did so many experiments with our teachers and friends. I want to go Porto at least one more time in my life.

The time I spent in Portugal was fun, I enjoyed Porto, Rio Tinto and most of the activities, but there were three I liked the most: the cruise on Douro River, because I haven't been on a boat trip for a long time; the Biodiversity Gallery, because there were so many interesting plants, animals and learnt about facts that I never heard about such as evolution of life on Earth, biosystems, biodiversity, etc.; the trip to Aveiro where we visited The Science Museum, mostly because we had the chance to experiment phenomena and tried out physical facts and experimented things but mostly because we built robots from Legos and discovered the city from a traditional boat. Aside from the fact that we had all of these wonderful activities, I liked the fact that I made new friends. It was an awesome experience!

Marc Anton Sebastian, 7th grade

Romanian team  
in Portugal

From the first to the last day of my Erasmus+ mobility in Rio Tinto, Portugal, I had a fantastic time. I really enjoyed the school, the workshops, all the visits and the trips. One of my favourites was when we went to Rota da Filigrana and made jewellery using the filigree technique, or when we went to The Biodiversity Museum and learned about life evolution on Earth, species diversity, and so on. Another activity I enjoyed was going to Aveiro and discovering a city similar to Venice but even more beautiful, as well as going to the Science Museum, where I built Lego robots. This adventure flew by and we didn't even realize we had

♡ to return. A once-in-a-lifetime opportunity! ♡

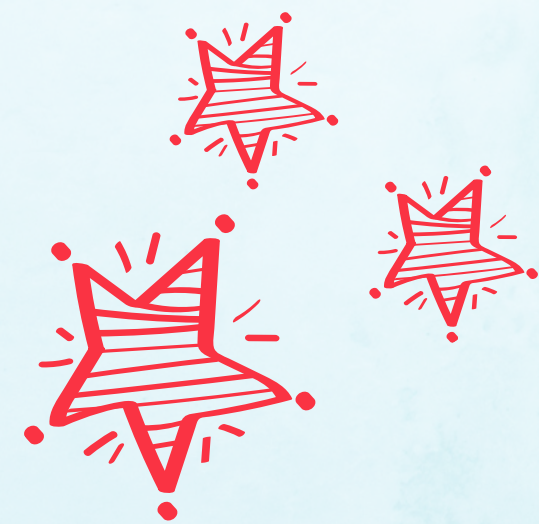

Botez Andea, 7th grade, Romania

# Croatian Team in Portugal

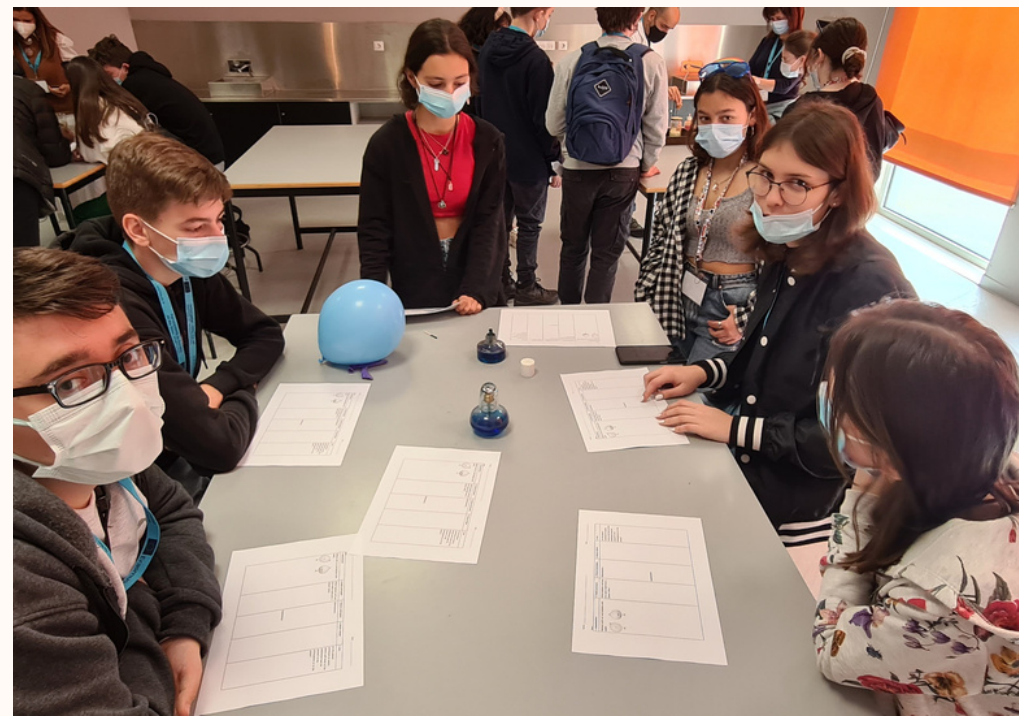

KLARA DODIG, 8th grade, Croatia

For me, Portugal was one beautiful experience. Let's start with the city... The streets are really small but interesting. Portugal has specific culture which is in many situations different than ours. Also, we went across the most popular bridge of Portugal which was such a beautiful experience. About food, we tried delicious traditional meals and desserts. For example, we tried Francesinha and Pastel de nata. I very much liked Francesinha because it is unusual and different from our traditional meals. We visited many museums which was really interesting and educational. My favourite thing was part where we had to make robots ourselves. We even saw real elements of periodic table. I saw how the life there can be hard for some people and I am really thankful for everything I got. In the hotel was really funny and we laughed until our stomach started hurting because we forgot our room keys inside the room (including the teacher). Regarding people and students there, I liked everyone, especially kids from Turkey. They were really talkative and kind. I will never forget people I met there and every friend I made. I will stay in contact with them just like I am now. All in all, Portugal will always have a special place in my heart. It was such a beautiful experience and I hope that I will get a chance to go there again and enjoy in pretty views of the city of Porto.

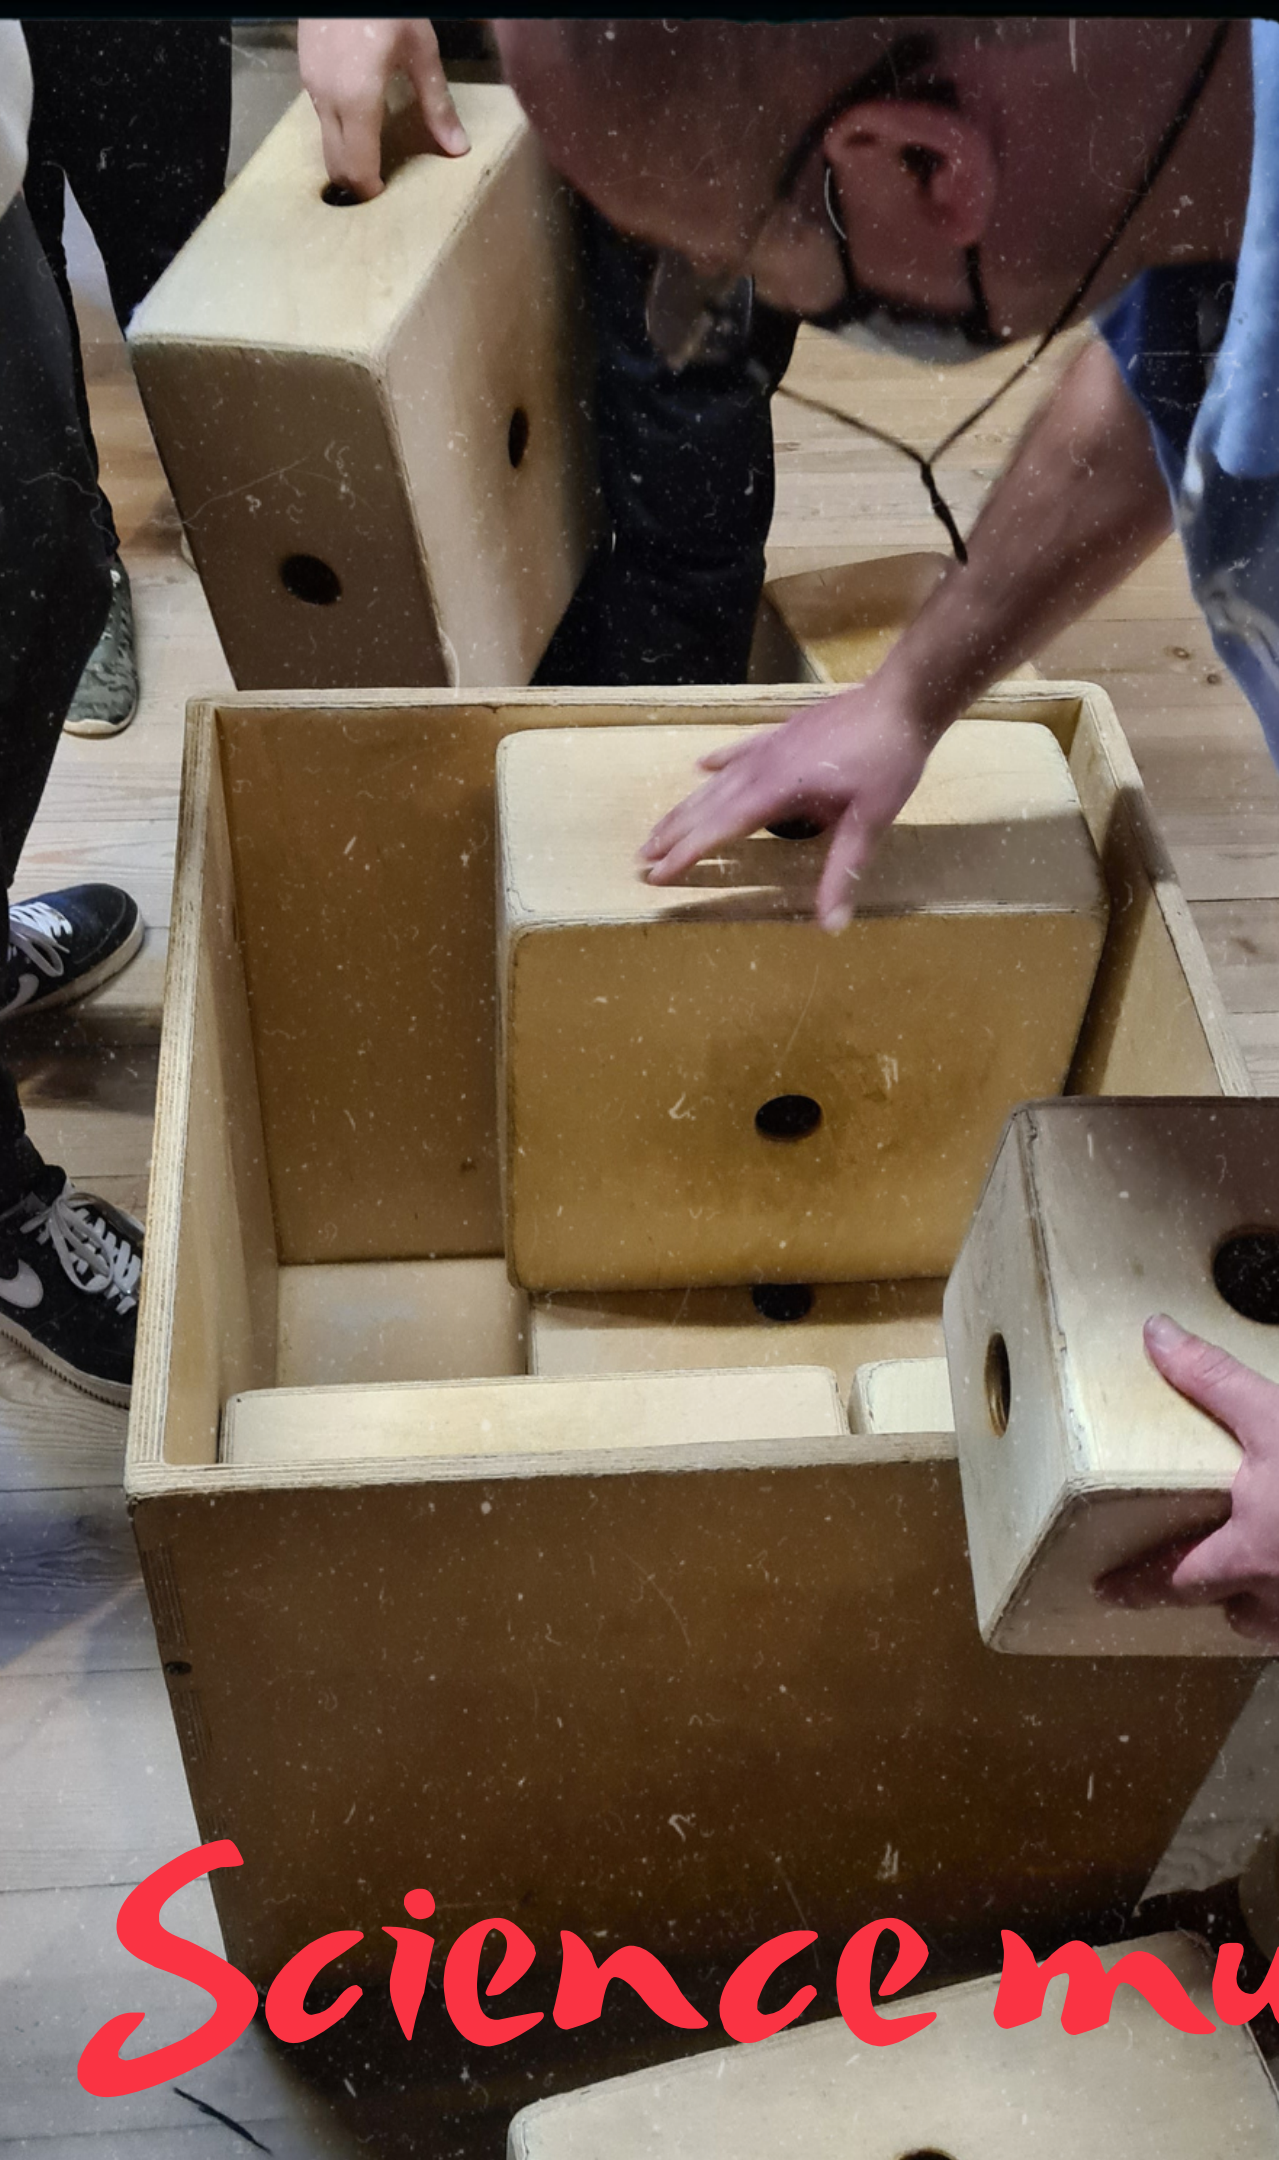

Portugal was an unforgettable experience. I had so much fun, I learned new things such as some new words in Portuguese, Turkish and Polish. I also saw the natural beauties of the city Porto. While we were staying in Porto we visited many beautiful places such as jewelry school, filigree museum, Aveiro, Biodiversity Gallery, Interdisciplinary Center of Marine and Environmental Research, Douro cruise. I am really happy that I had a chance to visit Portugal, because it was new and incredible experience for me. People from Portugal and other countries were really nice and friendly and I will never forget them. I had an opportunity to meet a lot of new friends, learn about new culture, get some new words in my vocabulary and I'm very thankful for that. If you dream about traveling somewhere I would definitely recommend Portugal, I promise you won't regret it.

Dora Posavac, 8th grade, Croatia

Science museum - Aveiro

# Polish team in Portugal

Denys Karach:

We were immediately warmly greeted at the airport and brought to the hotel, stopping by the ocean on the way and tasted to local sweets. The week was very busy, interesting lectures and projects at school, museums and various interesting places of the city. Nice evenings with dinner and a sea of unforgettable emotions is briefly about our trip to Portugal.

Jan Szmyt, Poland:

As a participant of the Erasmus SAAU project, Portugal – February 21st – 26th I am very satisfied with the course of the project, the way of organization and the activities that I had the opportunity to experience these days. Very good integration of all countries gave a nice and friendly atmosphere during all project activities. Establishing international contacts is a very important element and as one of the participants of the Polish group I can say that it was very interesting and engaging for all of us.

# 3rd LANGUAGE TEACHING TRAINING ACTIVITY

8. - 12. April 2022  
Poland, Łódź

# Portuguese Team in Poland

For the first time I left Portugal and flew over several European countries! Also, for the first time I saw real snow and felt how soft and cold it was. I tasted food from the country that welcomed us and from others who, like us, lived this Erasmus experience.

I visited fantastic museums and very old monuments such as the Royal Castle, the Palace of Israel Poznanski, and Science Centers such as Cosmo Discovery New Prague in Warsaw, ECI Science Center, Exerymentarium in the Manufaktura Complex. I heard typical music from other countries and even danced to those rhythms that I didn't know. In short, I lived in reality a magnificent dream!

Luana Marques, 9th grade

Rio Tinto Primary School 2,3, Portugal

*Science is all around us*

**Humanistyczno-Ekonomiczna w Łodzi**  
**ROK AKADEMICKI**  
**2021 / 2022**

This year, through my school I participated in the Erasmus Program, during one week. Everything was wonderful! Besides the fabulous trip, I especially liked meeting young people of my age and what they showed me.

I saw streets, neighborhoods and houses with different constructions than ours. I tasted tasty food, but with ingredients that we don't use in Portugal. I came into contact with people who have other cultures and different ways of living. I enjoyed visiting the Royal Castle, the Palace of Israel Poznanski, Manufaktura Complex and Science Centers such as EC1 Science Center, Cosmo Discovery New Prague, Experimentarium, strolling in Piotrkowska Street, and taking the opportunity to buy souvenirs. Tired, but very enriched, I returned to Portugal with the certainty that I learned a lot and that I wish to repeat experiences of this kind.

Patrícia Martins 9th grade

Rio Tinto Primary School 2,3, Portugal

# Romanian Team in Poland

I think, the trip I took to Poland with the Erasmus+ project was the most beautiful moment of my life, and even though I couldn't speak English and my emotions were not very well expressed, I learnt a lot, met wonderful people and visited beautiful places. Each day was an adventure for me, everything I had the chance to see, learn and explore was something I had never done before, so I am very thankful to the teachers for including me in this activity and also to my colleagues who helped me a lot and made me feel very well. I will never forget this experience!

Razvan Husanu -12th grade  
Liceul Teoretic "Sfântu Nicolae", Gheorgheni, Harghita,  
România

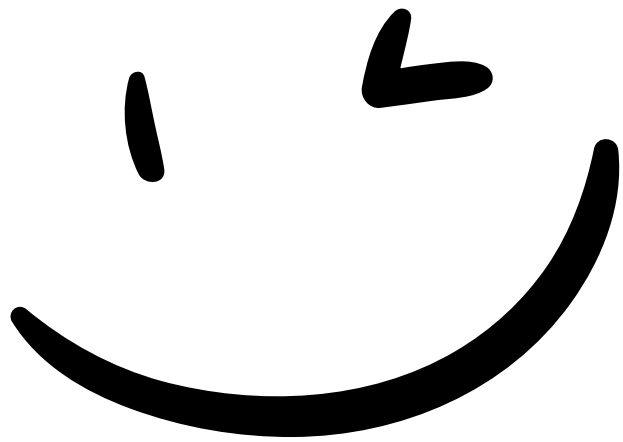

On the first day of the project, we were presented the school in Lodz, Poland, where we met the other participants, introduced ourselves and tasted the traditional sweets of each participating country. The next day, we went on an educational trip to Warsaw, where we visited historical sites and various historical and scientific museums, the old the city, which was very impressive, so we were immersed into Polish culture and history. On the third day we visited an old industrial factory from the communist era, transformed into a living city with shops, restaurants, small factories, housing for residents, etc. My favourite activities included the orienteering game in Lodz, which was very tiresome but exciting, the planetarium and the laser tag game.

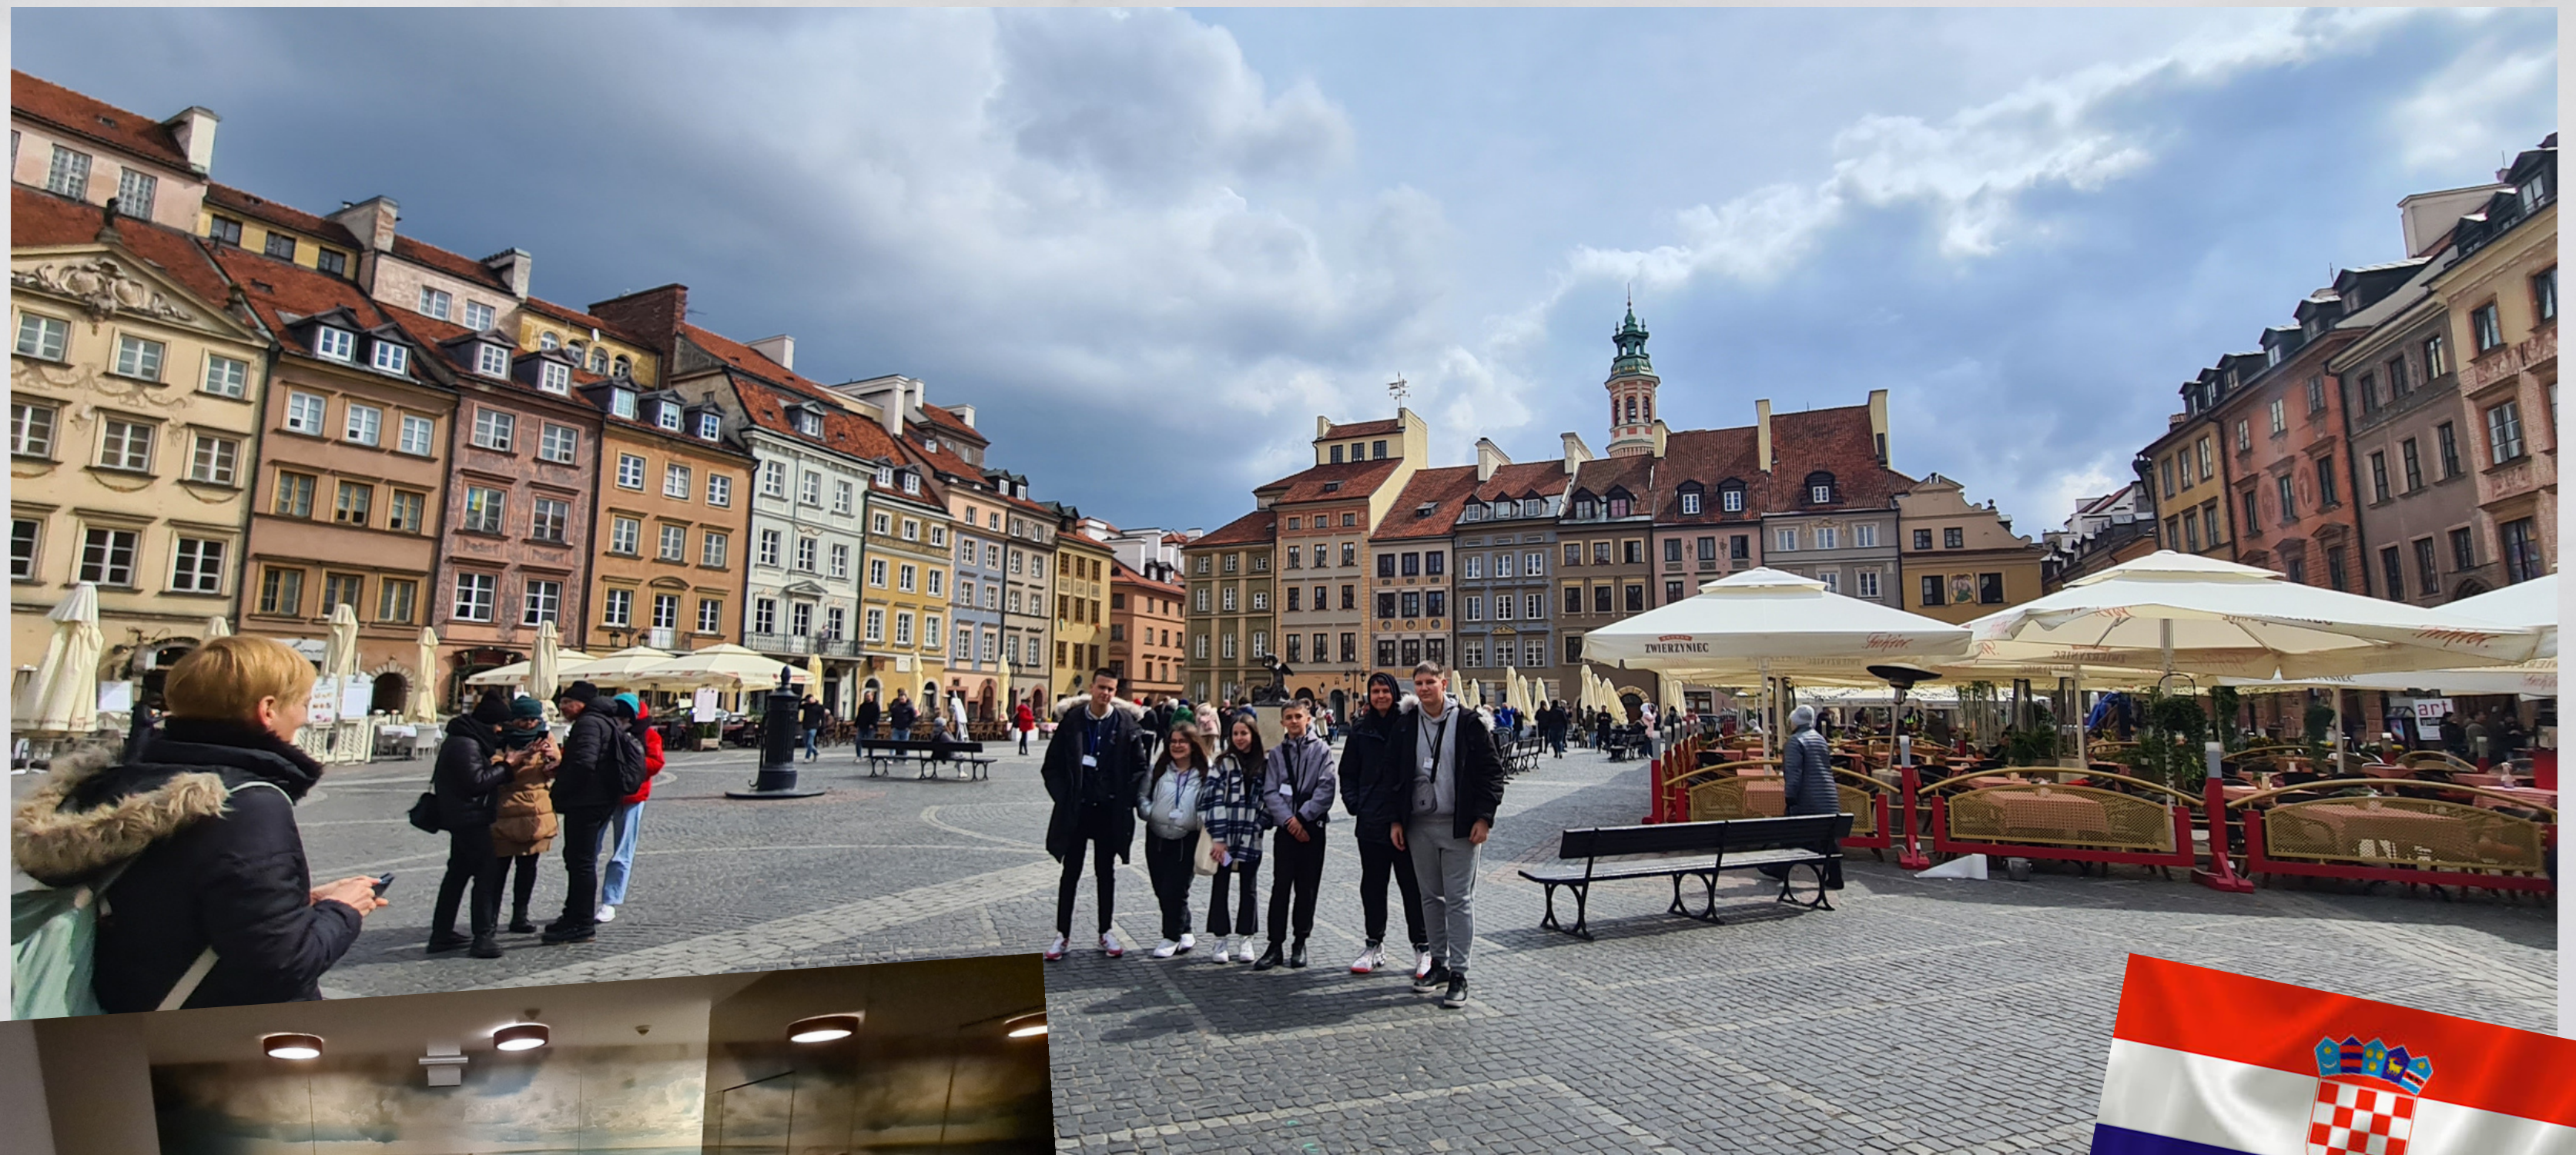

We spent most of the last day at school, after which we spent the evening at the festive dinner, where we were handed certificates, danced and said goodbye to our friends from other countries and Poland.

Thank you Erasmus+! We hope to see each other again!

Eduard Ungureanu & Savu George - 12th grade  
Liceul Teoretic "Sfântu Nicolae", Gheorgheni, Harghita, România

Croatian team in Poland

Our week in Poland was brilliant. I enjoyed every moment there. The hotel was nice. We tried some traditional food (like pierogi). We visited a lot of museums. For me the best museum was in Warsaw „The Royal Castle”. Warsaw is a beautiful city. Every day was fun and exciting. We went to Manufaktura where we played „laser tag”. For me the best day was trip to Warsaw because I made a lot of friends there. This trip meant so much to me because I met a lot of nice people and after I came back home, I stayed in contact with them. I learned so much during our stay in Poland: I found out a lot about their culture, history and language. All students were nice and friendly so I think we enjoyed every single moment with them. The moments I will never forget are when Dino hit a pillar in the street and when I planted my nails. I enjoyed every single moment in Poland.

Luka Liović, 8th grade, Croatia

**For me, the trip to Poland was something different. I met a lot of new and interesting people, I saw many historical beauties and attractions in Poland. I really liked when we went to the capital city of Warsaw or when we played laser tag game. One of my favourite museums was the Cosmos museum, because I am interested in the universe. I was impressed with the geography game in old mlyn, because my group won and it was so much fun. The only bad thing about the geography game was the fact that the weather was really bad.**

**The funny thing that I will remember from Poland was when I ran into a traffic sign. I will remember all the people and stay in contact with them. During the whole trip I practiced my language skills. I hope that I will see all the people that I met in Poland as soon as possible.**

**DINO VUKOJA, 8th grade, Croatia :).**

## Nergiz Hüseyin, Türkiye

This Poland trip was a great experience for me. As soon as I left the Airport, architecture impressed me a lot. Then I noticed the street artist singing for Ukraine and one we played orienteering game that I wanted to experience a lot. Our team came in second. It was also very interesting and fun to visit the museums of cultures very different from ours. I bought a lot of cultural presents for my friends and family, and I tried different tastes, I made new friends, so it was one of the most incredible weeks of my life.

## Arda Özkan, Türkiye

At the beginning of the trip, I didn't expect to have so much fun but when we arrived in Poland we were warmly welcomed. Paulina teacher, Dominic teacher and their students guided us in the best way. Contrary to what i expected, I never got bored while visiting museums because i loved Polish history very much. Seeing how Polish people never gave up and defend their country against to invaders, impressed me and gave me determination. On other hand I loved streets of Poland because of their architecture. If we mention about Erasmus Teams, they were so friendly. We had good friendships which i still talking some of them. Also, we taught each other's culture. During our trip Polish people were kind to us and they always helped when we had problem. I think the best thing we did was orienteering. Because there were people from every country in the orienteering teams this, which helped to get to know each other and search common solution. Second best thing we did was viewing Warsaw from skyscraper. Seeing Buildings of Warsaw was wonderful. I'm sure Polish food was great, but I wasn't able to try most of traditional food because of religious reasons. Final party was great chance to farewell other teams. After the trip is over, I was satisfied. I hope I will be able to go to Poland again.

Science is all around us

## Arika Wiktorowicz, Poland

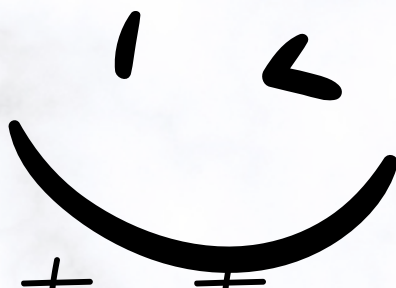

For me, it was my first time in an Erasmus project. I couldn't imagine how it looked but I tried and now I can tell that I am glad that I did. I met a lot of interesting and amazing people who are very helpful. I will remember them for my whole life. The best part was the geography game on Księży Młyn. I was one of the students who prepared the tasks for our guests. It was funny seeing them while they were solving tasks and answering questions. I think participation in Erasmus projects is very important because you can meet new people and you can improve your communication and language skills. I will remember this experience for the rest of my life.

Jan Szmyt, Poland

The meeting in Łódź was one of the most interesting and exciting times. All our guests surprised me with their happy faces and positive attitude. The best time we spent together was after attractions prepared by my school. We could show them Łódź with many long streets, interesting shops and many places to have fun or relax. I will always remember creative and funny things we did when we were alone without teachers.

**And that is all for 1st  
year of project**

**THANK YOU !**

*Made by Mirjana :)*
